

TopoDOT software price consist of a **license fee** (to be paid only once) and an **annual maintenance fee** (to be paid at the end of the year calculated upon user-days). There are 4 different licensing programs for the software varying the number of licenses and the allowed user-days per year. To get the most cost efficient solution it is very important to have a concept about the amount of user-days needed in a year. Please find the details in the charts below.

LICENSE FEE:

License program	Recommended for	License	User-days/year	License fee	Until 15th Dec. 2016	Until 31st January 2017
„Flex 250”	Municipalities	Unlimited	250	4 910 €	4 420 €	4 670 €
„Enterprise 250”	Great for getting started	Unlimited	250	4 910 €	4 420 €	4 670 €
„Enterprise 500”	Small- and medium-sized companies	Unlimited	500	8 610 €	7 750 €	8 180 €
„Enterprise 1000”	Medium- and large-sized companies	Unlimited	1 000	12 170 €	10 960 €	11 570 €

Maintenance fee covers the version updates, technical support and occasionally scheduled webinars. Particularly the maintenance fee is not a fixed cost, but it is paid after the use of the software. Not using the software will cause not having to pay any maintenance fee for that period. Using the software for more days than the purchased package allows will cause an extra cost for the overuse days. Please find the details below:

ANNUAL MAINTENANCE FEE:

The following prices are calculated from the current USD/EUR exchange rates thus may differ when calculating the maintenance fee at end of the year.

License program	Maintenance fee	Maintenance fee for extra user-days
„Flex 250”	3 090 € /year	No possibility of overuse. For more user-days a new package has to be purchased.
„Enterprise 250”	14.50 € /user-day	From day 251: 23.50 € / extra user-day
„Enterprise 500”	12.50 € /user-day	From day 501: 20.75 € / extra user-day
„Enterprise 1000”	10.75 € / user-day	From day 1001: 18 € / extra user-day

One user-day means using TopoDOT on one workstation within a day. More workstations using TopoDOT on the same day means more user-days. User-days are added up and paid at the end of each year.

Please NOTE: TopoDOT is a CAD application running on the following Bentley products: MicroStation V8, PowerSurvey and Bentley MX Road. You should own one of these products to run TopoDOT software.

This price list is valid until 31st January, 2017
